

Discussion: Inspect Element & Debug CSS

Changes made with DevTools will go away on refresh

1. Inspect the box below and add your name to the blank!

Hello, My name is Danielle!

2. Edit the CSS and change the background-color to cyan

Try using the color picker

Let's learn about inspect element and CSS

3. I am not accessible. I should have the correct style. Can you fix me?

I am accessible!

4. I wanted my font to be monospace, but for some reason I am not. Can you fix me?

I am a typewriter!

5. All elements are just boxes. Try changing some border, padding and margin using the box view in the Elements tab

I need some space!

6. Add a new CSS rule to make the links bold on hover

1. [Link 1](#)
 2. [Link 2](#)
 3. [Link 3](#)
